

StarCellBio Microscopy

Microscope functionality

Good example of a good user interface: [Virtual Microscope](#) (open source web application from the Open University in the UK - David Male)

Properties:

Measurement tool

Focus

Lighting (?)

Ability to reposition the slide

Slides holder

Filters for fluorescent microscopy when available within the images (Phase contrast, FITC, TRITC, DAPI, and Phase contrast + one of the other fluorescent filters -

[Reference](#))

Image Libraries

Sources:

- [The Cell Image Library](#)

- [Cell Center Data Base](#) (UCSD)
 - Also see the following software: <http://openccdb.org/software/index.shtm>

Other

[Nikon MicroscopyU](#): good site with good resources and visuals
