

Notebook Feature

Goals:

- To allow students to easily organize their experiments so that they can more effectively compare experimental results and conclusions from multiple experiments.
- To allow students to annotate their experimental results. Functionality should include ability to add:
 - small, sizable text boxes
 - arrows
 - basic geometric figures: square & circle
- To allow students to describe their experimental results and/or add conclusions.
- To allow students to easily search for experiments, data generated, etc.
- To provide a means for sharing data and analysis with colleagues and instructors.
