

Help Features and Extra Information

Hover text

The windows that pop up should have a gray background and the text should be Source Sans Pro.

EXPERIMENTAL SETUP

- Copy icon: Duplicate
- Trash icon: Delete

WESTERN BLOTTING

Sample Prep page

- "x" icon should be changed to a trash can icon, and should have "Delete" when the mouse is hovered over it.

Definitions

A pop-up window will appear when a user clicks on either a hyperlinked term or the "i" icon next to certain terms. The pop-up window will contain a short 1 sentence definition of the term and a link to the appropriate place within the Reference Library.

All of these pop-up windows should have the following formatting:

Line 1: **Term/word** in bold, followed by a period.

Line 2: The definition written out below. Normal font.

Immediately following the definition: 'Learn more' link. 'Learn more' text should be in green and semi-bold. (exactly like on the select techniques page)

WESTERN BLOTTING

Sample Prep

- **Lysate Type.** A lysate is a protein sample. There are three types of lysates that can be prepared: whole cell lysates, nuclear/cytoplasmic fractionations. Learn more.
