

Meeting with Terry - March 21, 2014

Techniques: FACS (DNA content), Western (same as last year), microscopy (may be light and fluorescence
- probably no microscope controls)

Strains: mammalian cells - could see chromosome segregation by microscopy

Timeline

April 2 - Meeting to lay out the problem with Terry

April 9 - Assignment drafted and coded within StarCellBio

April 14 - final review of assignment (if needed)

April 14-ish - give assignment to TAs for testing, give them 1 week to complete the assignment

April 21 - Assignment due back from TAs

April 25 - Assignment goes out

May 2 - Assignment due
