

Notes_from_meeting_with_Josh_on_Feb_11th_2013_and_important_StarCellBio_Spring_2013_dates

1. Important StarCellBio dates

- **Feb 12th, 11 am-1 pm:** Usability Testing
- **Feb 13th, 11 am:** Meeting with Terry to discuss assignment for this semester
- **Feb 14th, 9 am-1 pm:** Usability Testing
- **Feb 28th:** StarCellBio assignment prototype is finished in final form
- **March 1st:** StarCellBio pre-quiz?
- **April 1st:** StarCellBio student survey draft is due for TLL to revise
- **April 11th:** StarCellBio assignment is posted
- **March 28th:** StarCellBio is introduced into a cell biology classroom at Tufts
- **April 4th:** StarCellBio Tufts assignment is posted
- **April 25th:** StarCellBio assignment is due
- **April 26th:** StarCellBio post-quiz
- **May 1st-10th:** StarCellBio student interviews
- **Middle of May:** grading of StarCellBio's pre- and post-quizzes

2. Here are the things we talked about on Tuesday and that Alison also mentioned:

Once usability testing is done on Thursday, we will send you the usability test for you to perform on your own.

It will be great to get feedback on the 7.06 assignment question as Alison and I work on it.

Videos:

- Promo video on StarCellBio's Homepage telling users what the software is and what it is used for (1-2 minutes long). This would mainly be involving screencasts
- Western Blotting video explaining how to perform a western blot. The **Reference Library** material will be a good starting point. We will get you particular requirements of things we want in this video.
- Experimental Design videos showcasing case studies of graduate students/post-docs highlighting aspects of experimental design that they have either struggle with or aspects of experimental design that are not normally taught or highlighted but that are really important.

Grading StarCellBio pre- and post-quizzes.
